

CONSTRUCTION ENGINEER INTERNSHIPS

McCOWNGORDON
C O N S T R U C T I O N

Want to Be at the Center of a Construction Project?

McCownGordon interns see firsthand how projects move from concept to completion, while building skills that go far beyond the classroom

As a **Construction Engineer Intern**, you'll gain on-site experience working alongside project teams to help plan, coordinate, document, and manage commercial construction projects from start to finish.

- Assist with project planning, scheduling, site logistics, safety, and more.
- Gain experience managing project documentation, RFI's, and change processes using Procore.
- Participate in project meetings, pre-installation meetings, and field coordination efforts.
- Learn about budgeting, cost management, forecasting, quality, safety, and project close-out activities.

This internship is ideal for students who enjoy problem solving, working with people, and being on construction sites. You'll gain exposure to construction management, while helping build real projects that positively impact communities.

From site logistics to project closeout, you'll experience what it takes to successfully build a project. Start your career with McCownGordon.
