

MECHANICAL, ELECTRICAL & PLUMBING SPECIALIST INTERNSHIP

McCOWNGORDON
CONSTRUCTION

What makes a building work? The systems you don't see.

The lights. The heating and cooling. The plumbing. The technology. Behind every great building is a team of experts making these critical systems work together seamlessly.

As an **MEP (Mechanical, Electrical & Plumbing) Intern** at McCownGordon, you'll gain real-world experience working alongside industry professionals who help design, coordinate, estimate, and construct the systems that power modern buildings.

- Review construction drawings and learn how building systems are coordinated.
- Participate in constructability reviews, coordination meetings, and trade partner discussions.
- Assist with estimating, system analysis, and project planning activities.
- Visit jobsites and see engineering concepts come to life.
- Learn how MEP professionals identify risks, solve problems, and support project teams throughout the construction process.
- Gain exposure to controls, commissioning, sustainability initiatives, and emerging building technologies.

If you're curious about how buildings perform, enjoy solving technical challenges, and want hands-on experience that goes beyond the classroom, we'd love to meet you.
