

QUALITY ASSURANCE INTERNSHIP

McCOWNGORDON
C O N S T R U C T I O N

**Build your eye for quality. Strengthen your understanding of construction.
Make an impact on real projects.**

As a **Quality Assurance Intern**, you'll work alongside McCownGordon's Building Performance Solutions team to help ensure projects are built according to plans, specifications, and quality standards. You'll gain hands-on exposure to drawing reviews, building envelope systems, QA/QC planning, pre-installation meetings, mock-up reviews, and project site observations.

You'll have the opportunity to:

- Visit active jobsites and observe construction processes firsthand.
- Learn about building envelope systems, testing requirements, and construction best practices.
- Collaborate with project teams to solve everyday challenges, track inspections, and quality action plans.
- Use technology like drones and thermal imaging to diagnose building issues.
- Explore sustainability incentives, rebates, and emerging building technologies.
- Review construction drawings and learn how quality issues are identified before construction begins.
- Assist with project-specific Quality Assurance/Quality Control plans.

This internship is ideal for students who are detail-oriented, enjoy problem solving, and want to develop a deeper understanding of how quality, design intent, and construction execution come together to deliver successful projects.

Join us and gain real-world experience that will help you build a strong foundation for a career in construction, architecture, or building performance solutions.
