

CONSTRUCTION SAFETY INTERNSHIPS

McCOWNGORDON
C O N S T R U C T I O N

Build more than buildings. Build a safer industry.

Every successful construction project starts with a commitment to safety. At McCownGordon, safety isn't just a requirement; it's a core value that protects our associates, trade partners, and communities every day.

As a **Construction Safety Intern**, you'll gain hands-on experience working alongside experienced safety professionals on active jobsites while helping create a safe and productive environment for everyone on site.

- Participate in jobsite safety audits and inspections.
- Assist project teams with implementing site-specific safety plans.
- Contribute to project planning and hazard analysis activities.
- Learn how construction teams identify, mitigate, and prevent jobsite hazards.
- Support safety training, orientations, and awareness initiatives.
- Work with field teams to promote a positive safety culture across the company.

This internship is ideal for students who enjoy problem solving, working with people, being in the field, and making a real impact. You'll gain exposure to project planning, safety leadership, compliance, training, and field operations while helping ensure everyone goes home safely at the end of the day.

Safety doesn't happen by accident. Start your career helping build safer jobsites with McCownGordon.

SAFETY INTERNSHIPS

Interested in learning how construction managers keep people safe during the building process?

Our Safety roles focus on increasing safety awareness at McCownGordon and across the construction industry.

-
- Strong fit for Construction Management or Safety program students who are hands-on, comfortable communicating with different teams, interested in problem-solving, and motivated by helping people work safely.
 - Work alongside experienced safety professionals and project teams on active jobsites, seeing a wide variety of trades, scopes of work, and daily construction activities.
 - Participate in daily safety inspections, follow up with project teams, and learn how safety planning supports the way work is sequenced and executed in the field.
 - This role will split time between the office and field settings.
