

CONSTRUCTION SCHEDULING INTERNSHIP

McCOWNGORDON
CONSTRUCTION

What does it take to build a project on time?

Every successful construction project starts with a plan. Construction schedulers help coordinate people, materials, equipment, and milestones to keep projects moving from groundbreaking to ribbon cutting.

As a **Construction Scheduling Intern** at McCownGordon, you'll work alongside experienced scheduling professionals to learn how complex construction projects are planned, monitored, and managed. You'll gain exposure to schedule development, critical path analysis, project controls, and the tools that help keep projects on track.

You'll have the opportunity to:

- Learn how construction schedules are developed and maintained.
- Assist project teams in understanding schedule impacts and challenges.
- Gain exposure to critical path scheduling and project planning techniques.
- Collaborate with Operations, Estimating, and Sales teams.
- Help gather and analyze data related to weather, labor availability, materials, and other factors that influence project schedules.
- Learn industry-leading technology such as Microsoft Project, Bluebeam, BIM applications, and project management software.

If you enjoy problem solving, analytics, technology, and seeing how hundreds of moving pieces come together to deliver a successful project, this internship is for you. You'll develop valuable skills in planning, coordination, and project controls while helping support some of the region's most exciting construction projects.

Build the plan behind the project. Start your career as a Construction Scheduling Intern with McCownGordon.
